DETAILED ACTION

1. The indicated allowability of claim 1 is withdrawn in view of the newly discovered reference(s) to Fuke et al in further view of Szymanek. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Fuke et al (6,011,929) and further in view of Szymanek (4,891,737).
- 3. The recitation "a track light" has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).
- 4. Fuke et al discloses a reflector (2) extending along the length of said tube and having angularly disposed portions proximally joined at an apex on an optical axis of symmetry, said angularly disposed portions having distal edges(end portions of 2);a first

Application/Control Number:

Art Unit: 2875

and second light controlling member fixed to the edges of the reflector one light source positionable along the length of the tube between the reflector and first light controlling member, emitting light through the first and second light controlling member generally perpendicular to the length of the tube. Fuke does not specifically recite the first and second light controlling members being a diffuser and a lens. Szymanek discloses a light controlling system for a light fixture, having a lens body 11 extending between the diffuser and a potential light source, the lens extending between the distal ends of the diffuser. It would have been obvious to one of ordinary skill in the art at the time the invention was made for the first and second light controlling members of Fuke to include a lens and diffuser, respectively, for the advantages as taught by Szymanek.

Allowable Subject Matter

5. Claims 2-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The subject matter of claims 2 and 3 is not taught by the prior art cited of record. Claims 4-10 are allowable because of their dependency.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anabel M. Ton whose telephone number is (571) 272-2382. The examiner can normally be reached on 08:00-16:30.

10/656,718 Art Unit: 2875

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Sandra O'Shea can be reached on (571) 272-2378. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
